90 Date le funzioni

$$f(x) = \sin(\arcsin x) e g(x) = |\arcsin(\sin x)|,$$

- a. determina il dominio e l'insieme immagine di entrambe;
- **b.** disegna i grafici di f(x) e g(x);
- c. stabilisci se sono funzioni periodiche e, in caso affermativo, determina il loro periodo.

[a)
$$D: -1 \le x \le 1$$
, $Im(f): -1 \le y \le 1$; $D_g: \mathbb{R}$, $Im(g): 0 \le y \le \frac{\pi}{2}$;

c) f(x) non è periodica, g(x) è periodica di periodo π

= _ acin (sin x) = - X

a)
$$f(x) = \sin(\alpha i \sin x)$$

$$D = \begin{bmatrix} -1, 1 \end{bmatrix}$$

$$= x$$

$$\lim_{x \to \infty} f = \begin{bmatrix} -1, 1$$

of(x) = | arsin (sin x) im & = [0, #] f non è periodice perche non è definita in un internals illimitato Q è periodica di periode TT

- **a.** Trova il dominio, il segno e le intersezioni con gli assi della funzione $f(x) = e^{-x+1} 1$.
- **b.** Disegna il grafico di f(x) utilizzando le trasformazioni geometriche.
- **c.** Disegna il grafico di $y = \frac{1}{f(x)}$, di y = 2 + f(1 x) e di $y = \frac{f(x)}{\|f(x)\|} + 3$.
- **d.** Determina la funzione inversa $f^{-1}(x)$ indicando il dominio, l'insieme immagine e tracciandone il grafico.

$$f(x) \longrightarrow f(x+1) \longrightarrow f(-x+1) \longrightarrow 2+f(-x+1)$$
alternative
$$f(x) \longrightarrow f(-x) \longrightarrow f(-(x-1)) \longrightarrow 2+f(-x+1)$$

$$y = \frac{f(x)}{|f(x)|} + 3 = sign f(x) + 3$$

$$|f(x)| \longrightarrow 2+f(-x+1)$$

$$y = \frac{f(x)}{|f(x)|} + 3 = sign f(x) + 3$$

$$|f(x)| \longrightarrow 2+f(-x+1)$$

$$|f$$
